

YOUR ASSET ALLOCATION STRATEGY. PLUS A LITTLE MORE.

PortfolioPlus ETFs are a suite of exchange traded funds that add 25% more daily exposure to popular broad-based indexes. These ETFs allow investors to obtain \$1.25 worth of daily exposure to their benchmark index for every \$1.00 invested. Advisors can apply these leveraged products to their existing asset allocation strategies to seek greater upside potential over time.

PortfolioPlus ETFs allow you to:

- target increased daily exposure to common broad-based indexes;
- maintain allocations to the asset classes of the indexes within your strategy; and
- seek to provide magnified returns in order to seek outperformance over time*.

PortfolioPlus ETFs seek to deliver access to additional levels of exposure to magnify returns, in a cost-effective, transparent, liquid structure, to help portfolios work harder.

**PortfolioPlus ETFs seek returns that are 125% the return of their benchmark indexes for a single day. The funds should not be expected to provide 1.25 times the return of their benchmarks' cumulative return for periods greater than a day. Investing in PortfolioPlus ETFs may be more volatile than investing in broadly diversified funds. Compounding affects all investments, but has more impact on leveraged funds, particularly during periods of higher index volatility and longer holding periods. Due to periods of negative compounding caused by index volatility, a fund's return may be negative in the same period that its index's return is flat or positive. PortfolioPlus ETFs are intended to be used by investors who understand leverage risk and the effects of compounding, and intend to monitor their portfolios.*

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Returns for performance under one year are cumulative, not annualized. For the most recent month-end performance please visit the funds website at portfolioplusetfs.com.

**The Net Expense Ratio includes management fees, other operating expenses and Acquired Fund Fees and Expenses. If Acquired Fund Fees and Expenses were excluded, the Net Expense Ratio would be 0.32%, 0.38%, 0.35%, 0.45%, 0.45%, and 0.32% respectively. The Fund's Adviser, Direxion Advisors, LLC ("Direxion") has entered into an Operating Expense Limitation Agreement with the Fund, under which Direxion has contractually agreed to cap all or a portion of its management fee and/or reimburse the Fund for Other Expenses through September 1, 2019, to the extent that the Fund's Total Annual Fund Operating Expenses exceed 0.32%, 0.38%, 0.35%, 0.45%, 0.45%, and 0.32% of the Fund's daily net assets (excluding, as applicable, among other expenses, taxes, swap financing and related costs, acquired fund fees and expenses, dividends or interest on short positions, other interest expenses, brokerage commissions and extraordinary expenses). If these expenses were included, the expense ratio would be higher.*

DISCLOSURES:

An investor should carefully consider a Fund's investment objective, risks, charges, and expenses before investing. A Fund's prospectus and summary prospectus contain this and other information about the PortfolioPlus ETFs. To obtain a Fund's prospectus and summary prospectus call 833-547-4417 or visit our website at www.portfolioplusetfs.com. A Fund's prospectus and summary prospectus should be read carefully before investing.

Shares of the PortfolioPlus ETFs are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Brokerage commissions will reduce returns. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.

PortfolioPlus ETF Risks – An investment in the ETFs involve risk, including the possible loss of principal. The ETFs are non-diversified and include risks associated with concentration that results from the ETFs' investments in a particular industry or sector which can increase volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause their price to fluctuate over time. For other risks including leverage, correlation, daily compounding, market volatility and specific risks regarding each sector, please read the prospectus.
